

An offer made by the establishment of a technological infrastructure (Hardware, Software and Connectivity) absolutely "Dedicated" and delivered in a "Managed" structure. The service includes in addition to providing the necessary infrastructure, support and assistance to the installation, configuration and management system and above all the applications provided and installed.

For this "Managed" is a "turnkey" solution absolutely reliable and safely but also free from all activities, like operating system problems, for example. This feature in fact guarantees the proper setup, configuration and operation of hardware, OS and the applications in use, but also their constant monitoring, and support such as upgrades to the relevant and required periodically issued by the same vendor / producers (patches, service packs, hot fixes etc.)

Additional technical features:

- *Managed Dedicated Server Dual/Quad Processor Intel;*
 - *Ram up to 32 Gbytes;*
 - *Hard Disk SATA/SAS up to 2 Terabyte (HW RAID1);*
 - *Dedicated bandwidth up to 1000 Mbit/s flat;*
 - *Unlimited Traffic;*
 - *Flash Media Server 4.5 Dedicated License;*
 - *Unlimited Users and Connections;*
 - *Weekly backup service (also external to the server if required);*
 - *Monitoring system 24/24;*
 - *Web control panel for account management and services;*
 - *Any partitions or special requirements in terms of management of disk space will be required during the activation;*
 - *Managed care and the service is delivered through the Customer Support email address assistenza@fmshosting.it 24h, 7 days on 7. In addition to administrative tasks and maintenance system set includes those management services as defined and agreed upon.*
- Any extra activities and / or further customization requests thereafter will be quantified and budgeted separately*
